

# 2020 Colleagueville Workshop on Scientific Software

Developer Productivity

July 21 - 23, 2020

# Thanks to Our Sponsors

- Intel Corporation and The Mathworks, Inc.
  - Support to fund student staff
- College of Saint Benedict & Saint John's University
  - Home institution, host of Zoom resources
- Thank you!

COLLEGE OF  
Saint Benedict

Saint John's  
UNIVERSITY

MathWorks®

# Meeting Purpose

## Code of Conduct

Be considerate, respectful, and collaborative. Communicate openly with respect for others, critiquing ideas rather than individuals. Avoid personal attacks directed toward other attendees, participants, and CW20 staff. Be mindful of your surroundings and of your fellow participants.

- Explore commonalities, differences, complementarities, workforces of
  - Academia
  - Industry
  - Labs
- Build knowledge and awareness to improve productivity
- Main purpose: Build community

# Workshop Agenda

- All live sessions use Zoom
  - Panel: Single session
  - Discussion: Single session with random breakout assignments
  - TeaTime/Poster: Separate session for each
- Key Document: “Collegeville 2020 Main Page”
  - Google Doc
  - <https://tinyurl.com/Collegeville2020>
  - Single page to find out what is happening

## Agenda

Time (US CDT)	July 21 <a href="#">Get Details</a>	July 22 <a href="#">Get Details</a>	July 23 <a href="#">Get Details</a>
9:45 am	Opening Remarks <a href="#">(Add to calendar)</a>		
10:00 am	Panel 1: Productivity Definitions & Challenges <a href="#">(Add to calendar)</a>	Panel 2: Technical Approaches to Improved Productivity <a href="#">(Add to calendar)</a>	Panel 3: Cultural Approaches to Improved Productivity <a href="#">(Add to calendar)</a>
11:30 am	Break & Slack Discussions	Break & Slack Discussions	Break & Slack Discussions
12:30 pm	Discussion 1: Productivity Definitions & Challenges <a href="#">(Add to calendar)</a>	Discussion 2: Technical Approaches to Improved Productivity <a href="#">(Add to calendar)</a>	Discussion 3: Cultural Approaches to Improved Productivity <a href="#">(Add to calendar)</a>
2:00 pm	Break & Slack Discussions	Break & Slack Discussions	Break & Slack Discussions
3:00 pm	TeaTime/Posters 1: Productivity Definitions & Challenges <a href="#">(Add to calendar)</a>	TeaTime/Posters 2: Technical Approaches to Improved Productivity <a href="#">(Add to calendar)</a>	TeaTime/Posters 3: Cultural Approaches to Improved Productivity <a href="#">(Add to calendar)</a>
4:30 pm			Closing Remarks <a href="#">(Add to calendar)</a>

# Whitepapers & Recorded Content

- 29 videos on Colledgeville YouTube Channel
  - 9 interviews with a variety of community members
  - 10 group discussion on productivity themes
  - 10 presentations from whitepapers
- 33 whitepapers on website
- Most have related video content

*Make use of this content during and after the workshop*

# Use of Slack during meeting

- We encourage Slack chat during the meeting at any time
  - Especially during panels and breaks
  - To keep discussion organized around themes there is a special channel for each day (day-one-chat, day-two-chat, day-three-chat)
- Keep Zoom panel chat reserved for Q&A

# Panel 3: Cultural Approaches to Improved Productivity

- Panelists:
  - Sandra Gesing, University of Notre Dame
  - Jan-Patrick Lehr, Technische Universität Darmstadt
  - Reed Milewicz, Sandia National Laboratories
  - Vanessa Sochat, Stanford University
  - Mary Ann Leung, Sustainable Horizons Institute
  - Mark Miller, Lawrence Livermore National Laboratory
- Moderator: Lois Curfman McInnes, Argonne National Laboratory

# Sandra Gesing Opening Remarks: Cultural improvement approaches

- One or two high impact cultural approaches to improve productivity
  - Well-defined roles in developer teams
  - Well-defined processes
- Key roles in defining and implementing the above approaches
  - Team leaders, developers, computational scientists, facilitators
- Potential impact if approaches are successful
  - Managed expectations
  - Choice of focus of work on technical as well as on domain side  
=> Happy developers;-)
- Existing “bright spots” or other signs of progress
  - Upcoming RSE teams and RSE associations, spread of word of success stories
  - Existing project management frameworks such as SCRUM and further developments of agile development

## JP Lehr Opening Remarks: Cultural improvement approaches

- 1) Include productivity concerns and technological solutions more actively into (academic) teaching to better prepare (under-grad/phd) students
  - Communication, technological, positivity, writing, ...
  - Include (under-grad) students as full-project members: discussion, peer-review, documentation, design, writing papers, ...
- 2) Acknowledge the complexity of software development, the software stack, the system stack, etc.
  - Simply run these benchmarks, or make something faster
  - **Key roles** 1. “everybody”, 2. management / supervisor (Prof, PostDoc, PhD)
  - **Bright Spots** Conferences promote/request artifacts and reproducibility

# Reed Milewicz: Opening Remarks

- **Approach:** Increase engagement with the software engineering research (software science) community
- **Roles**
  - **Software scientists:** We need to establish closer ties with software scientists in academia, and we need to create more roles for them in our institutions
  - **Scientific software developers:** We need to publicize our challenges and make them attractive to the software engineering community
- **Potential Impact**
  - Software engineering tools and processes that were built with our needs in mind
  - Pipelines for software-focused professionals
- **Signs of Progress**
  - Software engineering line organizations like Software Engineering and Research at Sandia and Research Software Engineering at Oak Ridge
  - In academia, the Software Engineering for Science group at the University of Alabama

# Vanessa Sochat Opening Remarks: Cultural improvement approaches

Developer productivity comes down to developer happiness!

- Physical and mental well-being
- Self-compassion
- Practicing empathetic review

Each of us is empowered to make positive changes.

- Take responsibility for your goals, routine, and communication channels

Note from Lois: See Vanessa's podcast series:

**RSE Stories:**

[https://bssw.io/blog\\_posts/research-software-engineer-stories](https://bssw.io/blog_posts/research-software-engineer-stories)

# Mary Ann Leung Opening Remarks: Broadening Participation

- Why broadening participation to improve developer productivity?

Future Workforce Needs

CSE complex, teamwork, creativity, collaboration

Research → Diverse teams are more innovative

- High impact cultural approaches:

expand networks

cultivate inclusion

address critical mass

balance critical mass & integration

- Potential impacts if successful: innovation, sustainability

innovation

sustainability

- Examples: Sustainable Research Pathways, Broader Engagement @SIAM-CSE

# Mark Miller Opening Remarks: Cultural improvement approaches

- Individual recognition of...
  - Equality  $\neq$  Inclusion (Equality  $<$  Inclusion)
  - Good/decent people can still be deeply biased
  - Anisotropy in dimensions of bias & inclusion

- More faith in organic, grass-roots, bottom up approaches than top-down
  - Individual + first tier management (w/support from top)
- Benefits of inclusion known but there are costs
- We do inclusion great for process/product
- People willing to talk about it **now** more than they ever have

# Q&A Protocol

- Use Zoom chat to type your question (brief form)
- When your question is mentioned, unmute to ask verbally
- Unless asked to speak, please keep muted
- For general chat about panel, use Slack #day-three-chat
- Panel ends at 11:30 am CT or when no more questions
- Stopping screen sharing now so we can see faces 😊
- Will start up to give instructions for Discussions

# Workshop Zoom Group Photo Time

Everyone who'd like to participate:

Please turn on your camera and smile

# Discussions, Posters, Teatimes Instructions

- Please sign in to next Zoom session promptly at 12:30 pm US CDT
- At 12:35 pm, we will use Zoom breakout rooms with automatic random assignments to form discussion groups of 6 – 8 people
- Discussions are scheduled from 12:30 – 2:00 pm CDT
- Posters and Teatime theme discussions start at 3:00 pm CDT
  - There are two posters and four teatime themes today
  - Each discussion has its own unique Zoom link (see Main Page for details)
  - Please visit any and all of them as you have time and interest
- We will gather as one group for Closing Remarks at 4:30 pm CDT
- Questions?

# 2021 Collegeville Workshop on Scientific Software: Software Sustainability

July 20-22, 2021

<https://collegeville.github.io/CW21/>

- Register by joining Collegeville 2021 Slack workspace
  - <https://collegeville.github.io/CW20/Registration2021.html>
